

1.4.1

? PatchMon 1.4.1

A maintenance release with OIDC improvements, FreeBSD agent support, installer fixes, and various bug fixes and improvements.

? OIDC Improvements and Hot Fixes

- OIDC authentication fixes and stability improvements
- Hot fixes for edge cases in SSO flows

?? FreeBSD Agent Support

- **Native FreeBSD agent support** — run the PatchMon agent on FreeBSD hosts
- Initial FreeBSD support via community contribution

? Native Installer Upgrade Fixes

- Fixes for native installer upgrade paths
- Improved reliability when upgrading existing installations

? Host Table Views Not Saving -> Bug Fix

- Fixed an issue where host table view preferences (columns, sort order, filters) were not being saved
- Table view state now persists correctly across sessions

? Agent Memory Leaks and Improvements

- Addressed memory leaks in the agent
- General agent stability and resource usage improvements

? Better API Integration Scoping

- Improved scoping for Integration API credentials and access

- Tighter integration between API keys and their permitted scope
-

? Acknowledgements

- **@RuTHlessBEat200** — for agent and OIDC fixes
 - **@mminkus** — for FreeBSD initial PR
 - The rest of the community for their support and help on Discord and GitHub
